I am interested in health issues but I especially want to keep the issue of "alternative" and complimentary health on the table

Early morning is best for those who work but not the best for me as I live out of town. I have also felt tired of meetings after my long career with the health dept. so I am probably not a person you should count on. Do what's best for the group & there may come a day when I participate again. If you want to take me off the emailing list, I would understand. Deb Banton

It would be good to discuss how we can better keep in communication with the Health Alliance to keep them on track and remind them we are here to help.

There is a need to make sure CHAC meets the milestone measurements as defined in the grant in order to assure funding to continue with operations. Beyond that I would like to see more participation in the development of a community clinic and education on palliative care.

Include access to care for under-served on every agenda; I'm more interested in learning updates on various recommendations that in attending educational workshops.

I think what you are doing is great...there is just so much going on it is overwhelming...But you need more physicians and employer at the table...and city and county leaders...but know they are busy too...think we need a bigger cross representation of people thruout the county...just a thought...

I really appreciate the work the group is doing. One of my goals is to see that "alternative" providers are invited and included in whatever decisions we reach.

To clarify I am an individual member. I do work for organizations that impact health care in the County. However, they do not send me or give me any incentives to be on the CHAC. When I give to CHAC it is from my pocket.
